

Paradigm [OOPS] → object-oriented programming paradigms

→ object + method
→ operate on objects

Is this prog. lang oops?

→ C is not oops
→ C++ (partially), java, js, object-based, python, php

P. Hays
of
OOPS

- ① Encapsulation (class + objects)
- ② Inheritance
- ③ Polymorphism
- ④ Abstraction (Data hiding)

template of objects

class/Prototype/Blueprint
[C++]
[C#]
[JS] template of JS objects

OOPS
→ JS X

T.11 ES5

Prototype

① function Name() {
this.name;
this.age;
}

ES6 (2015)

class (syntax)

① class Name {
constructor {
this.name;
this.age;
}

② class University (base)

③

class Machine (parts)

class Library (time)

class Football (order)

derived / child classes
extends - inheritances
super() → call parent class function constructor.
