

Loops
 ↳ executes block of code couple of times
 ↳ condition to stop

↳ conditional statement (if, else, else if, switch)
 ↳ loops (for, while, do while)
 (for...in, for...of) in ES6

Primitive Datatypes
 ↳ number
 ↳ string
 ↳ null
 ↳ Boolean
 ↳ undefined

Non-primitive
 ↳ objects
 ↳ Arrays

JS → object based

Pseudo code

↳ Try to understand the problem & expected output (input provided)

↳ Design a flow chart (define the condition)

↳ Write a pseudo code / write statement

```

if (condition) {
    // pseudo code
} else {
    // pseudo code
}
  
```

Example of 3 numbers

```

a, b, c
max = 0
if (a > b) {
    max = a
} else {
    max = b
}
  
```

```

if (max > c) {
    // max is greater
} else {
    // c is greater
}
  
```

Flow charts
